

## NAWW Contribution to Implementation of SDGs

The future is open for women empowerment in the Arab region through developing dedicated initiatives towards achieving the SDGs with the focus on gender equity.

Establishing a thematic network for Women will provide them with suitable capacities, facilities, communication platforms, tools for better performance and support their contribution in the Water Sector.

It is foreseen that NAWW will contribute to the implementation of the SDGs' targets, where members can identify the possible areas of collaboration, on both regional and local levels, to support the implementation of gender equity in relation to all SDGs.

## ABOUT US

The Network of Arab Women in Water (NAWW) is a collaborative platform established for shaping a better future for Arab Women in the Water Sector by providing opportunities for development, fostering valuable connections and collaboration, facilitating access to knowledge, ensuring effective and equal participation in leadership and decision making. NAWW is a platform to support Arab Women to have a better recognized contribution in the professional, leadership and decision making roles in the water sector.

## OUR MISSION

We are committed to empowering Arab Women in the Water Sector to achieve success on their own terms. We strive to provide opportunities for professional women to connect with and support each other for better recognition and visibility.

We deliver programs that contribute to the personal and professional development of our members, meeting their needs at the right time in the right way. We contribute to the SDGs' implementation for a better and stronger Arab World.

## OUR VALUES

We recognize our strengths.

We pursue continuous education and learning.

We create opportunities.

## Knowledge Sharing Platform

NAWW will create an ICT based knowledge-sharing hub and learning platform as the key tool for knowledge dissemination. This will be along with regional workshops to share the best practices, lessons learned and innovative ideas implemented in the region, in addition to developing a set of publications to support the network activities, to help in serving our greater goal of achieving gender equality and advocating for women's rights.

## OUR GOALS

Although women play key roles in obtaining and managing water globally, they are rarely offered roles in water improvement programs on local or regional levels. Establishing collaborative regional platforms is important to empower and create better opportunities for Arab women in the water sector and support them to overcome different challenges. Therefore NAWW as a regional collaborative network is established to achieve the following goals;

1. Advocating for the strong inter-linkages between women, water and sustainable development in the drafting of policies and their implementation.
2. Advocating for equal access to the Employment market, financial investments and tools.
3. Promoting gender disaggregated indicators & gender equality in the water sector.
4. Establishing a strong regional platform for collaboration, knowledge sharing and continuous learning for women in water, to enhance their contribution to their communities, countries and region.
